All of these amazing brands and products in one place!
Come and visit us on Stands 100 and B01!
Welcome to The Dental Technology Showcase 2016

The Dental Technology Showcase (DTS) has now been running for 13 years, and in that time has grown into a combined clinical and business conference, plus a major trade exhibition, catering for the whole laboratory team.

With over 100 companies exhibiting, DTS 2016 will be the largest and most diverse assembly of trade suppliers, service providers and professional organisations available to Lab Owners and Technicians at any UK event. Each and every exhibitor will have a new product, new idea or specialist advice while many will be showcasing the latest equipment or materials, the best offers and support services to help you and your team run a smarter, more efficient, and profitable dental laboratory business.

Already there are 30+ exhibitors that were not with us in 2015, so if you think you saw it all last year, then think again. Please make sure you visit these exhibitors and see what they have to offer, they may have the solution you’ve been looking for - see page 8 & 9 for more details!

Across the trade floor you will also find manufacturers from around the world who are looking for a UK agent, distributor or wholesaler to help take their product to market. If you offer these services to international companies then, again, please make the time to find out what they’re looking to introduce to the UK profession.

The success and expansion of DTS is down to thousands of proactive, passionate lab owners and technicians like you, utilising the event to meet the trade. Your support has created a marketplace for suppliers to showcase their portfolio of products and, in turn, from their support and investment we are able to improve and enhance the delegate experience each year by offering a more enriched clinical and business education programme for the profession, for FREE.

All the lab and technician membership bodies and regulatory organisations that will be present at DTS provide exceptional support to dental professionals, so please visit those relevant to you and find out how they can support your career and business - they can be found.

This will be the biggest and best DTS yet - I hope you can join us. Register for your FREE place if you haven’t already by visiting: www.the-dts.co.uk/guide or call 020 7348 1866.

Kind Regards

Matt Stokes
Show Manager, The Dental Technology Showcase

TwiNY Polymeric composite material - the second generation light cure material with a unique light and heat cure cycle. Manufactured from patented Nano technology and cures via light & Heat, an unprecedented Flexural strength of 239 Mpa is achieved, almost twice the flexural strength of other composite material on the market. The perfect material for Implant work as it can be repaired in the mouth using chairside composite materials.

JP vest - growing in leaps and bounds in it's popularity, JP Vest is SPECIFICALLY formulated as a pressable investment. USP's include a minimal or even no reaction layer - the technicians worst enemy. Its tiny corn size and excellent flow characteristics result in near perfect reproduction of any detail that will not be lost through removal of the reaction layer because it is hardly there!

Amann Girrbach AG

Open to change!

With the Ceramill CAD/CAM system Amann Girrbach provides one of the most versatile and technically experienced in-house solutions for computer-supported fabrication of restorations. A well-conceived quick-change holder concept matched to the respective material characteristics is based on the wide range of possible indications and processable materials. It guarantees absolutely precise and efficient processing of the respective material and its easy handling in daily laboratory routines is impressive. Amann Girrbach now provides an additional blank holder for processing size 98 blanks using the Ceramill Motion 2 and Ceramill Mikro CNC milling machines in addition to the existing blank holders for size 71 blanks, titanium abutment blanks or glass-ceramic blanks characteristic for Ceramill. Together with the size 98 holder all size 71 blanks from the classic Ceramill material range will also be available as size 98 discs for Ceramill and other open CAD/CAM systems.

VISIT US AT STAND 110

Bracon Ltd

Proud to represent some of the best quality manufacturers from around the world!

And this year is no exception. Aside from our ever-growing range of respected equipment and materials for the laboratory market, we are now an authorised dealer of the internationally renowned Medit Scanner for the digital marketplace.

Using Blue LED technology with a market-leading accuracy of only 7 microns and 3 versions available to suit any budget, now is the time to buy or even upgrade your existing set up.

The highest specification Identica Hybrid, with its open design, can scan a full arch model in just 16 seconds. The seven step process conventional scanners need to scan multi-die sectioned models is reduced to just three. Producing open-source files, this system utilises the world-renowned exocad® software with no compulsory licence fees. Optional annual fees for additional upgrades and modules are also available.

Too see this marvel of technology in action, visit us on stand 110. You will be glad you did.

We also offer a comprehensive range of materials, equipment, benches and chairs and our industry expert sales team will be on hand for any enquiries, from basics to laboratory refits: We’ve got your needs covered.

VISIT US AT STAND 332

Carbolite Gero

Carbolite Gero Dental Furnace – making sintering of zirconia dental crowns and frameworks easy

With a maximum operating temperature of 1530°C and a 1 litre capacity chamber, the Carbolite Gero Dental Furnace provides easy sintering of zirconia dental crowns and frameworks. The furnace is equipped with 3 robust high-quality non-contaminating silicon carbide heating elements, free from any chemical interaction with zirconium oxide.

The furnace has four programs; three for sintering frameworks plus a fourth freely adjustable program for sintering dental oxide ceramics:

• Program 1 - standard program for all common indications
• Program 2 - fast sintering programme for single units
• Program 3 - sintering with extended cooling
• Program 4 - Each segment contains one heating rate, temperature hold stage and, if defined, one cooling rate.

The Carbolite Gero dental furnace offers excellent temperature uniformity and precise temperature control and is optimised for operation from a standard 16A single phase mains supply. It comes complete with a sintering tray and 200 g of zirconium support beads.

Cookson Dental

Cookson Dental, a division of the renowned Heimerle & Meule Group is a world leader of specialist materials, having built its reputation based on quality and customer service.

Over 60 years of experience producing high quality dental alloys has resulted in THE specialist alloy supplier. The Mattigold and EC alloy ranges have been reliable and trusted brands for many years and have attained a loyal following. From NHS work to high quality Private cases, you can be assured that we have the right alloy to suit your requirements.

Our expertise in both Crown and Bridge and Prosthetics has allowed us to develop an ever expanding range of innovative and cost-effective products and materials from top brands designed to support high quality restorations for all applications.

Call for our free Catalogue or browse our website at www.cooksondental.com. Alternatively, you can call us on free phone 0800 289881.

VISIT US AT STAND 140

DB Lab Supplies

DB Lab Supplies is a supplier of Orthodontic laboratory products, Thermoforming - Iconic, CAD/CAM, Non precious alloys - Atomium and general laboratory products - Rhino Rock. We are agents for Leone, SAM articulators, Whitepeaks CAD/CAM.

Iconic Semi Rigid Bleaching Tray Material, is a newly formulated bleaching tray material. The potential problems the dental technician has when vacuum forming a bleaching tray is over-heating and then over-thinning the tray. Resulting in a paper thin tray, with reduced strength and rigidity. Iconic Semi Rigid Bleaching Tray Material, has a higher melt temperature when compared to other bleaching trays, making it more resistant to over-heating. The higher melt temp, also prevents the tray over-thinning, making the finished tray thicker with more body. Iconic Semi Rigid is available in 5” square x 1mm thick DBL3-0820. To request a sample please visit our stand 218 at the DTS, or contact DB Lab Supplies 01535 650578.

VISIT US AT STAND 320

GC UK Ltd

GC will be launching several innovations at DTS including Labolight Duo, their new LED Dual Mode Light Curing Unit for indirect composite resins. It is a multi-functional light-curing unit offering both pre-curing and final-curing capabilities. Equipped with double wave length LED technology, it can be used to reliably cure any of GC’s composite resins, facilitating optimal hardening with reduced cycle times. Compact and ergonomic, it reduces space requirements and allows easy access because of its wide opening.

The extended Fujirock EP range, GC’s superior quality Type 4 Dental Stone for use in the construction of all kinds of prostheses, is now available in three formats! All three can be combined to enable Technicians to choose the shade combinations that bring out the best in their work.

Also on show, all the latest developments in the Initial LiSi range, GC’s specialized veneering ceramic designed for lithium disilicate frameworks.

GSK

Visit the Poligrip® stand at DTS!

The GSK Consumer Healthcare team will be visiting this year’s DTS with one of the UK’s leading denture brands, Poligrip®.

By 2020, around half the UK population will be over 50.¹ This increase in the elderly population may present a greater stress on dentistry and oral care products.

Visit the Poligrip® stand 630 to find out what Poligrip® has to offer to support your denture patients including denture cleansers and fixatives, helping to make their denture experience more comfortable.

It is important that you, as well as the patient, know how to use each product to its full capability which is why materials will also be available for you to help support your denture patients further, enabling them to eat, speak and smile with confidence.

Make sure you come equipped with your questions and we look forward to meeting you.

Trade Marks are owned by or licensed to the GSK group of companies.

VISIT US AT STAND 630

Heraeus Kulzer

Heraeus Kulzer will be showcasing iBOND Universal. iBOND Universal is the universal, light-curing adhesive for any bonding technique and all indications. Being compatible with all dental materials, it is the all-rounder for reliable bond strength.

In addition, we will have a wide variety of highest quality dental products available to demonstrate including 4 which have been ranked as TOP products by The Dental Advisor. The products from Heraeus Kulzer were acclaimed in the categories TOP 5th generation bonding agent for iBOND Total Etch, TOP aesthetic composite for Venus Pearl, TOP alginate alternative for Xantasil and TOP dynamic mixer for Dynamix Speed. “To be considered for an award, products have to receive an excellent rating by The Dental Advisor, as well as stand out from all others in the market place,” the editor-in-chief emphasises in her editorial.

VISIT US AT STAND 330

John Winter

Exclusively available at John Winter

The Ref-Line teeth will be launching at the DTS 2016. Warm intensive cervical, light enamel colour and diverse surface structure makes the teeth look natural.

Mesial and distal transparency, melamons and enamel cracks copy the natural tooth structure.

Anatomic posterior teeth shape, with high level of detail on the occlusal surface.

Ref-Line teeth are made from a new composite acrylic material. The material is composed of pre-cross-linked polymer and the matrix reinforced by inorganic nano- and micro-filers.

compared to conventional acrylic, the new Ref-line material offers improved resistance to the mechanical wear, good resistance to plaque adhesion, colour stability, higher hardness, excellent polishing properties and good adhesion to denture base materials.

The design of the retention hole allows faster modelling of retention pins on implant bars.

Only two lateral holes are needed to provide mechanical retention for pressable base materials

Consignment stocks available

John Winter, proud suppliers of Tavom, Shera, Vertex, Polident.

Nobel Biocare UK & Ireland

Designed to deliver outstanding results when used together, all cutting-edge implant products from Nobel Biocare are supported by extensive clinical research and development. Being launched at DTS is the exciting NobelDesign® – highly efficient and intuitive CAD software for NobelProcera® restorations. Its advanced yet simple-to-use tools facilitate the efficient manufacture of highly accurate restorations, while ensuring multiple cases are easy to manage. The tooth setup and mirroring features will save you time, while the virtual articulator function will help optimise occlusal contact points for superior prosthetics. What’s more, NobelDesign® incorporates innovative technology that visualises designs in photo-realistic rendering, giving you a clear indication of how tooth shape and fissure design will appear in the patient’s mouth. Particularly valuable when used in combination with the high-precision NobelProcera® 2G scanner, you’ll soon see the benefits of the powerful CAD software that is NobelDesign®!

Schottlander

Schottlander was founded in 1922 and have prospered and are growing through an absolute commitment to the highest quality products, training and services that answer genuine clinical needs. We have twice received the Queens’ Award for Enterprise in the Innovation Category.

At the Dental Technology Show we will be showcasing all our ranges of denture teeth including the latest addition enigmaLife+, a new range truly inspired by nature. Our guide in their design was the beauty, detail and proportions that nature builds into our teeth and we sought to reproduce its miracle. Never before in a range of denture teeth has so much attention been paid to its natural beauty.

For further information on Schottlander’s range of denture teeth and the marketing support we can offer please visit Schottlander on Stand 15, Freephone 0800 97 000 79 or visit www.schottlander.com

Straumann

Straumann® CARES® M Series in-lab milling

Market leaders in implant, restorative, regenerative and digital dentistry, Straumann is proud to be headline sponsors of The Dental Technology Showcase 2016 and introduce you to their NEW in-lab milling solution.

In collaboration with Amann Girrbach, Straumann can offer dental laboratories the capability of milling custom dental prosthetics in-lab via the Straumann® CARES® M Series. This state-of-the-art, five-axis in-lab milling machine can be used to produce a wide range of prosthetics, from inlays, onlays, veneers and single crowns to bridges and screw-retained restorations.

Prosthetics can be milled or ground in wet or dry modes from a wide range of materials including zirconia, glass ceramic, PMMA, wax and lithium disilicate ceramics.

As it uses the Straumann® CARES® Visual software and scanning technology, the in-lab milling machine will be offered with the new Straumann® CARES® S Series and 7Series Scanner for labs entering digital workflows, or as a standalone for customers already equipped with a scanner.

For more information, visit Stand 310 at DTS 2016 or contact Straumann on 01293 651230 or visit one of our sites:

WHW

The DTS 2016 will see the launch of a range of exciting new lines, where there will be something for everyone. Amann Girrbach will be launching a new scanner and several innovative materials in 38mm. We will also be honoured to announce our collaboration with Kalabhai, a prestigious manufacturer of plaster and die stones. The cream Labstone will set the new standard for class III plasters and with free mainland UK shipping and ultra-competitive pricing, we hope this will be of interest. All the plasters and dies stones will be supplied in boxes for ease of storage. As always we will be adding to our ever growing Centri range, proudly manufactured in the UK.
